Agenda Workshop Interceptor – WP6: Socio-economics, impact and ethics

Background: The aim of WP6 is to build a network of Centers having the expertise, facilities and availability and a framework to conduct Health Technology Assessments (HTA) of new preventive strategies for OPMD (such as early detection programs, or biomarkers) for their own country in order to support implementation and reimbursement.

Aim of workshop: To construct a basis for a HTA framework concerning early detection for oral potential malignant disorders (OPMD)
